

**AUTHORIZATION TO PREPARE SEMEN FOR AN OFF-SITE INSEMINATION**

We have requested that the Andrology Laboratory of North Hudson IVF Center prepare semen for intrauterine insemination at our doctor's office. We have been advised that the prepared specimen must be kept at or near body temperature to maintain the viability of the sperm and that insemination should be performed as soon as possible. We understand and agree that once the prepared specimen has been removed from the premises, North Hudson IVF Center is no longer responsible for the integrity of the specimen.
